### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 31, line 10: "reversing the motor to a second direction" has been changed to - - reversing the motor in a second direction - -.

The following is an examiner's statement of reasons for allowance:

**The claim 31** is allowable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including:

driving a motor at a first rate in a first direction to rotate a first roller in a forward direction and contacting the media sheet with the first roller to move the media sheet at a first speed along a first section of a media path;

driving the motor at the first rate in the first direction to rotate a second roller in the forward direction and contacting the media sheet with the second roller to move the media sheet at a second speed along a second section of the media path; and reversing revising the motor in a second direction and continue rotating the second

roller in the forward direction and contacting the media sheet with the second roller to move the media sheet along the second section of the media path; and driving the motor in the second direction with the first roller contacting the media sheet and rotating freely as the media sheet is driven by the second roller.

**The claim 47** is allowable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including:

a pick mechanism having a pick arm extending into the input tray and a pick roll positioned at a distal end to contact a media sheet within the input tray;

a feed nip positioned downstream from the pick mechanism a distance less than a length of the media sheet, the feed nip having a drive roll and a driven roll; a motor that operates in a first direction and a second direction;

a first gear set extending between the motor and the pick mechanism to drive the pick roll at a first speed;

a second gear set extending between the motor and the drive roll to drive the drive roll at a second speed substantially equal to the first speed;

the second gear set comprising a swing arm pivotally positioned between a first orientation with a first gear contacting the drive roll when the motor operates in the first direction, and a second orientation with a second gear contacting the drive roll when the motor operates in the second direction.

**The claim 48** is allowable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including:

a pick mechanism having a pick arm extending into the input tray and a pick roll positioned at a distal end to contact a media sheet within the input tray;  
a feed nip positioned downstream from the pick mechanism a distance less than a length of the media sheet, the feed nip having a drive roll and a driven roll; a motor that operates in a first direction and a second direction;

a first gear set extending between the motor and the pick mechanism to drive the pick roll at a first speed when the motor operates in the first direction;  
a second gear set extending between the motor and the drive roll to drive the drive roll at a second speed greater than the first speed;

the second gear set comprising a swing arm pivotally positioned between a first orientation with a first gear contacting the drive roll when the motor operates in the first direction, and a second orientation with a second gear contacting the drive roll when the motor operates in the second direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
